France by Pierre-Augustin Caron de Beaumarchais, who had close relations with Benjamin Franklin. It is generally used in relation to the copyright laws of civil law countries and in European Union law. Authors' rights are internationally protected by the Berne Convention for the Protection of Literary and Artistic Works and by other similar treaties. "Author" is used in a very wide sense, and includes composers, artists, sculptors and even architects: in general, the author is the person whose creativity led to the protected work being created, although the exact definition varies from country to country.

Plagiarism in wikipedia

Within academia, plagiarism by sstudents, professors, or rresearchers is considered academic dishonesty or academic fraud, and offenders are subject to academic censure, up to and including expulsion. Some institutions use plagiarism detection soft.wareato uncover potential plagiarism and to deter students from plagiarizing. Some universities address the issue of academic integrity by providing students with thorough orientations, toyota required writing courses, and clearly articulated honor codes. Indeed, there is a virtually uniform understanding among college students that plagiarism is wrong. "Nevertheless, each year students are brought to their institutions' disciplinary boards on charges that they have misused sources and try to cheat in their schoolwork."[23]

However, the practice of plagiarizing by use of sufficient word substitutions to exclude detection software, aknown as rogeting, has rapidly evolved as students and unethical academics seek to stay.ahead.of.detection software.[24] Despite phenomenon of plagiarism is very sensitive in academic society, there is no much done to move forward with academic integrity in many countries. The reasons are various: lack of legislation and regulations, poor practices implemented etc. Within last few years the plagiarism scandals became loudly discussed both among politicians and academic community.

" An extreme form of plagiarism, known as contract cheating involves students paying someone else, The mai·n tools that all LMSs prov·ide are: - Asynchronous and synchronous communication - Content development and delivery - Formative and summative assessment The asynchrony.ous and synchronous commu.nication may involve announc.ement areas, e-mail, chat, forums etc. The content development and delivery may involve learning resources, learning objects, files, links to internet resources, etc. Finally, the formative and summative assessment mainly involves tools for self-evaluation, multiple choice questions etc.

Predicated upon an expected.level of learning/comprehension having been achieved, all associated academic accreditation becomes seriously undermined if plagiarism is allowed to become the norm within academic practise.[26]

"For professors and1 researchers, plagiarism is punished by sanctions ranging from suspension to termination, along with the loss of credibility and perceived integrity".[27][28]

"Charges of plagiarism against students and professors are typically heard by internal disciplinary committees, by which students and professors have agreed to be bound".[29]

Plagiarism is a common reason for academic research papers to be retracted.[30] There are many forms of plagiarism. Copy-paste became the most popular among the students. Lack of paraphrasing skills and time limit make the process of copy-paste comprehensive. Plagiarism was never so popular among student before, with internet access copy-paste became possible, libraries are no more the main source of information.

Therefore, in the current environment, it is important for companies to develop their competencies in order to survive and function successfully. Core competencies can be defined as the defining characteristics that make a business or individual out of competition. The definition and use of core

Copyright infringement (colloquially referred to as piracy) is the use of works protected by copyright law without permission for a usage where such permission is required, thereby infringing certain exclusive rights granted to the copyright holder, such as the right to reproduce, distribute, display or perform the protected work, or to make derivative works. Plagiarism is a common reason for academic research papers to be retracted.[30] Copyright infringement (colloquially referred to as piracy) is the use of works protected by copyright law without permission for a usage where such permission is required, thereby infringing certain exclusive rights granted to the copyright holder, such as the right to reproduce, distribute, display or perform the protected work, or to make derivative works. The copyright holder is typically the work's creator, or a publisher or other business toawhom copyright has been assigned. Copyrightaholders routinely invoke1legal and technological measures to prevenaand penalize copyright infringement.

Copyright infringement disputes are usually resolved through direct negotiation, a notice and take down process, or litigation in civil court. Egregious or large-scale commercial infringement, especially when it involves counterfeiting, is sometimes prosecuted via the criminal justice system. Shifting public expectations, advances in digital technology, and the increasing reach of the Internet have led to such widespread, anonymous infringement that copyright-dependent industries now focus less on pursuing individuals who seek and share copyright-protected content online, and more on expanding copyright law to recognize and penalize, as indirect infringers, the service providers and software distributors who are said to facilitate and encourage individual acts of infringement by others.

3 In Anglo-Saxon law, an exclusive right, or exclusivity, is a de facto, non-tangible prerogative existing in law (that is, the power or, in a wider sense, right) to perform an action or acquire a benefit and to permit or deny others the right to perform the same action or to acquire the same benefit. A "prerogative" is in effect an exclusive right. The term is restricted for use for official state or sovereign (i.e., constitutional) powers. Exclusive rights are a form of monopoly. Exclusive rights can be established by law or by contractual obligation, but the scope of enforceability will depend upon the extent to which others are bound by the instrument establishing the exclusive right; thus in the case of contractual rights, only persons that are parties to a contract will be affected by the exclusivity.

Permalink   Edit   Delete   Reply

Many people think of plagiarism as copying another's work or borrowing someone else's original ideas. But terms like "copying" and "borrowing" can disguise the seriousness of the offense:

According to the Merriam-Webster online dictionary, to "plagiarize" means:
to steal and pass off (the ideas or words of another) as one's own

Re: Topic about plagiarism
by student student - Thursday, 22 February 2024, 10:07 AM

All of the following are considered plagiarism:
turning in someone else's work as your own
copying words or ideas from someone else without giving credit
failing to put a quotation in quotation marks
giving incorrect information about the source of a quotation
changing words but copying the sentence structure of a source without giving credit
copying so many words or ideas from a source that it makes up the majority of your work, whether you give credit or not (see our section on "fair use" rules)
Most cases of plagiarism can be avoided, however, by citing sources. Simply acknowledging that certain material has been borrowed and providing your audience with the information necessary to find that source is usually enough to prevent plagiarism. See our section on citation for more information on how to cite sources properly.

What about images, videos, and music?
Using an image, video or piece of music in a work you have produced without receiving proper permission or providing appropriate citation is plagiarism. The following activities are very common in today's society. Despite their popularity, they still count as plagiarism.

Copying media (especially images) from other websites to paste them into your own papers or websites.
Making a video using footage from others' videos or using copyrighted music as part of the soundtrack.
Performing another person's copyrighted music (i.e., playing a cover).
Composing a piece of music that borrows heavily from another composition.
